- ▲ ▲ Gender gap before accounting for performance in mathematics and reading
- ■ Gender gap after accounting for performance in mathematics and reading

Score-point difference (girls - boys)

**Notes:** Statistically significant differences are marked in a darker tone (see Annex A3).

As data for reading performance in Spain were not released, the gender gap after accounting for performance in mathematics and reading in Spain could not be calculated.

Countries and economies are ranked in descending order of the gender gap in financial literacy performance, after accounting for performance in mathematics and reading.

67% vs 52 % of women surveyed in Singapore in the 2015 Standard & Poor's (S&P) Global Financial Literacy Survey were financially literate

This gap of 15% is 3x the global average gap (5%) and one of the largest among the 140 countries in the survey

Suppose you have \$100 in the bank and the bank is giving you interest of 5%. After ten years, if you don't take any money out, how much would you have in the account? More than \$150, exactly \$150 or less than \$150?

## I keep track of my expenses

## I have savings of my own

## I know the value of my savings

## I have a good understanding of investments

## I know the value of my own investments

## I have an emergency fund to cover me for six months

## If I have a very sudden emergency, I would be able to borrow \$500 in 1-2 days

## COVID-19 and Financial Resilience

## In the last five years: Had to take care of ill or disabled family member

No significant differences: loss of spouse, illness of self

## Thinking about or discussing my personal finances can make my heart race or make me feel stressed

## I feel in control of my future when it comes to money matters

Thank you!
